

ISONAS Access Control Solutions

ISONAS IP solutions are designed to put real-time control of security in your hands. With our true network devices you have no need for control panels. The reader-controllers connect directly to your company data network and authorized personnel control all access functions at the PC. Use this checklist to plan the right solution for your security needs. When you are ready to buy, visit our online store at www.isonas.com or contact our sales department: 800/581-0083 X 102.

Select your choice of:

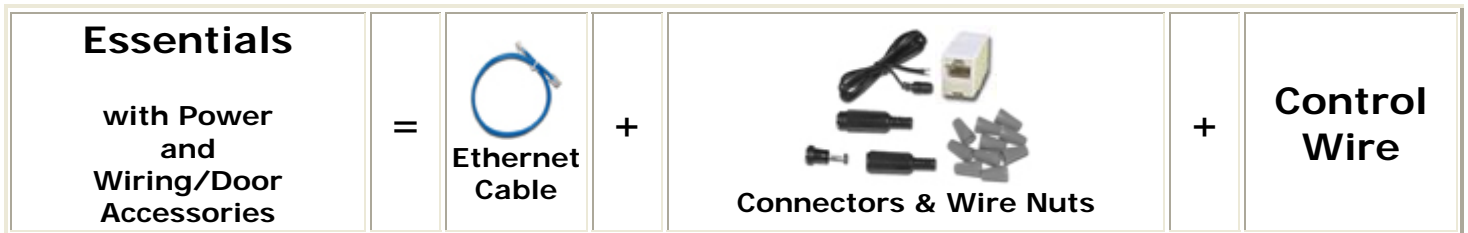

- IP Reader or Wireless IP Reader - with or without HID compatibility
- Magnetic or Electronic lock
- Credentials - thin cards, badges or keyfobs
- Optional software upgrade: Advanced Security Option for Property Management

The Essentials above plus Power Over Ethernet which includes:

- Your choice of single port, 6-port, 12-port or 24-port Midspan
- A 12VDC Splitter
- Your choice of 350va, 500va or 700va Line-Interactive UPS Power Backup

OR the Essentials above plus DC Power Source (Transformer and 12vdc Battery)

In addition to purchasing the Essentials and a Power Source, you can complete your solution with your choice of:

- Ethernet Cable and optional Ethernet Coupler
- Power cord receptacles for your PoE devices
- Control Wire and Wire Nuts
- Magnetic Door contacts (for standard or steel doors)
- Round or Bar-style REX Buttons
